USED EISELE MODEL VA-O-PV Fully Automatic Cold Saw

The Eisele Model VA-O-PV is a maximum precision and production machine with standard features such as material clamping on both sides of sawblade, double stroke of feed carriage, piece counter with auto shutdown, two speed blade motor, etc.

The automatic material feed advances the material to a pre-set cut-off length from 3/8" to 24" in a single stroke. A standard double stroke feature is built into the electrical controls.

The double clamping system is pneumatic and the infinitely variable power feed of the saw head is controlled by an air/hydraulic system. Lubrication on both sides of the blade is provided by a built in flood coolant system, which lubricates the cut flushing away the chips into two separate waste containers.

SPECIFICATIONS:

- **Maximum Cut Dimensions:** Round Tubing 3-1/2"
Solid Round Stock 3"
Square Tubing 3-1/8"
Solid Square Stock 3"
- **Recommended Saw Blade:** 275mm x 2.5mm x 40mm (11" dia.)
- **Variable Cutting Feed Range** 0-79 inches per minute
- **Rapid Return Speed:** 236 IPM
- **Minimum/Maximum Cutoff Lengths:** 3/8" - 48" (w/double index)
- **Spindle Speeds:** (4) 9.3/18.6/40/80 RPM
- **Main Motor:** 1.8/2.9HP, 40/80 RPM wired for 460 volts
- **Air Pressure Required:** 120 PSI
- **Approximate Machine Dimensions:** 80" L x 42" W x 66" H
- **Approximate Weight:** 2,500 lbs.

FEATURES AND STANDARD EQUIPMENT:

- Four spindle speeds from 9.3 to 80 RPM
- Heavy duty saw head double shaft design travels on a double column for extreme rigidity
- Burr free vise grips both sides of material being cut
- Hydra-pneumatic system with infinitely variable feed adjustment
- Automatic shut down after achieving pre-set number of cuts or when out of material
- Floating feed device compensates for bent material
- Enclosed full electric over and under load voltage protection
