EISELE MODEL ZMS D

Double Door Frame Miter Cold Saws for Ferrous Metals

The Eisele Model ZMS D machines are highly specialized saws for straight and miter cutting of wide structural shapes and tubing with a wall thickness 1/8" or less, and up to 1/4". The saw units move horizontally on precision ground and hardened ways, and tilt between 0° and 45° to cut an exceptionally long miter.

The pneumatic material clamping is vertical to permit front end loading against a rigid back fence, with front material guides. The power feed of the saw unit is infinitely variable with an air/hydraulic system.

The ZMS D saw consists of one right and one left tilting unit, synchronized and operated from a central control panel with foot-pedal activated clamping and sawing cycle. The units are adjustable sideways on floor mounted rails with stop-blocks and positive locking fixtures, as well as a length measure guide.

Machine Capacity:	<u>at 90°</u>	<u>at 45°</u>
Rectangular	15-3/4" x 4" 15-3/8" x 5"	15-3/4" x 3" 15-3/8" x 3-1/2"

Machine Specifications:

Wall thickness:	1/4" maximum
Saw blade size:	16" diameter
Saw blade speed:	28 / 56 RPM
Feed speed:	0 - 59 IPM
Motor:	1.9 / 2.5 HP
Electrics:	220 / 3 / 60
Weight:	3,000 lb.

Delivery: Stock, subject to prior sale.
Terms: cash before removal.

PRICE: F.O.B. Aurora, IL

\$19,500.00

SN: 2153 & 2154

Year: 1979
