2675 WHITE OAK CIRCLE • AURORA, ILLINOIS 60504

## **TRENNJAEGER MODEL PMC 8 (Used)**

Designed for longitudinal and cross cutting of steel sections, plates and billets in straight cuts. Cutting height 8-1/2", cutting length 24". Machine has a rebuilt gearbox and upgraded electrical. The saw is capable of mitering to 45 degrees with the turntable.

- Machine stand of solid steel construction
- Planed machine table of high tensile strength steel
- Cutting head with adjustable dovetail guides
- Gear box with large helical hardened gears
- For segmental circular cold saw blades of 560mm (22") and 660mm (26") diameter
- Fixture for chip remover
- Adjustable blade stabilizer
- Centralized lubrication system for guide tracks of cutting head carriage
- Two speed drive motor 3-3/4 hp, 1500/3000 rpm, with Vee belt step pulley for 4 saw blade periphery speeds 53/106 & 75/150 ft/min
- Thermo-magnetic motor protection switch
- Complete hydraulic equipment – Hydraulic motor, 1.5 hp, 1500 rpm pump, pressure gauge and thermo-magnetic motor protection switch
- Manual control valves for saw feed and vertical and horizontal clamping
- Two vertical clamping cylinders with 12" stroke, adjustable longitudinally and one horizontal clamping cylinder with 1" stroke adjustable laterally
- All hydraulic and electrical installations are easily accessible
- Built in tool and electrical cabinets
- Machine finish – gray
- Operation voltage 220 volts, 60 cycle or 440 volts, 60 cycle Please specify

Delivery from stock, subject to prior sale
